Calmoseptine, Inc.

Huntington Beach, CA 92649

I would like to thank you for the relief and help that the use of "Calmoseptine" has given a friend of mine. She is a spunky 80 year old leg amputee (above the knee) and is legally blind.

For the past 5 years she has had many problems in the peri-anal area while wearing 6 different prostheses and intermittent bouts of bladder infections due to sitting in one place for long periods.

The incontinence with the bladder infections presented special problems because she is unable to get to the bathroom quick enough on one leg and a walker. During these times she is forced to wear diapers (with much protesting) which cause severe burning sensations and irritation. Everything we have tried gave very little or no relief until the infection was controlled and the incontinence stopped.

The last two infections occurred while she was hospitalized and they used "Calmo-septine" which gave her immediate relief and the reddened areas soon subsided. She is now in a Skilled Nursing Facility and I had "Calmoseptine" on hand at the onset of the latest infection and she said "it feels WONDERFUL - LIKE COOL MINT". It gave her instant relief. Thanks so much for CALMOSEPTINE!

Sincerely

Margaret
