Dear Wendy,

I recently have had four Surgeries including two ileostomys. I now have Completed my goal and have a self anal pullthrough with a J-pouch. I heard about your product Calmoceptine from a nurse at providence Hospital in Everett, wa her name is Julie. Your product has really helped me. I have tried several different products and nothing Compares to it. The only problem I have had is no one will sell it in Quantity for a Cheaper price. For a 4oz tube it is \$7.50. And I use alot of it everyday. If there is some way you could help me find a way of purchasing it for a lower price it would be very helpful. I have told everyone about this product. Including all my health care providers so they can Recomend it to all of there patients. I think this product would also be great for babies with diaper Rash. I intend to use this on my baby when I start a family. I also ~~may~~^{might} start talking to people about there surgeries and preventive care and I plan on telling more and more people about this.

Thank you in advance for helping me. If you have any Samples you could send me it would be greatly appreciated.

Sincerely,
Fristin
