

January 29, 1993

Dear Sirs,

I've been using your product "Calmoseptine" since Sept. '92 after my closure operation for colon cancer at Cedars Sinai and find it a blessing to use as it certainly lives up to its reputation.

While in Cedars Sinai, I was introduced to it by the staff to combat a rash that results from my daily feces discharges. (You go to the restroom 12-15 times daily and you'll be so raw you want to shoot your doctor for this miracle of modern science.) Within 1 day, the raw skin was gone and another day brought complete relief. This was the True Miracle, I told the nurses.

Since then, I have used it daily and I'm down to only 5 times daily on my discharge, which is a miracle in itself considering the amount of time since my last operation.

I even use it on my 2 yr old grandson who's being potty trained now and never have I seen anything work so quick.

The only problem I've had was getting the product without having to drive to L.A. That was somewhat remedied when I called your 800 line & found Long's Drugstore could order it. They now do that for me but have problems with backorders from McKesson. I found it on the shelf at a Gemmel's Drug but quite frankly at almost twice the price. Using as much as I do, that turns into a lot very fast especially when the insurance does not cover over the counter medications. Maybe someone should talk to them (McKesson) about stocking more?

Through our support group at Cedars, I have several new people using your product (20 so far and growing) and as I did, they too have found almost instant relief.

It's the only product that takes care of new problems and medicates the rawness also. Sween has one covers the area but does nothing for the medication of the raw skin. Calmoseptine is by itself in this field.

I wish all the medicines I take worked as fast and as well as yours.
