Dear Wendy

A note to let you know what a fantastic product Calmoseptine is - Everyone in my family have different uses for it but I want to specifically tell you how it has helped me

I have had a fungus on the tips of my fingers for well over a month. I tried every conceivable ointment, salve or hand lotion possible and nothing helped. After talking to my daughter-in-law about my problem she sent me your samples of Calmoseptine and within 2 or 3 days the cracks have healed and my hands <sup>are</sup> on the way back to normal

Please get this wonderful product on the market soon - Every household should have it in their medicine cabinet.

Sincerely

David Williams
