HUNTINGTON BEACH, CA 92647

Dear Mr. Dixon,

I am writing to you concerning your product CALMOSEPTINE OINTMENT.

I am a Colon and Rectal Surgeon and I have found a great use for Calmoseptine Ointment. One of my most commonly performed procedures is colonoscopy. The preparation for the examination includes being purged of stool. This is an arduous task and the patients' most common complaint is the soreness that is associated with multiple bowel movements.

When I discuss the instructions for the preparation I include several packets of Calmoseptine Ointment and I instruct them to apply the cream to the perianal area before they start the prep and after every movement during the preparation. This regimen has virtually eliminated the soreness associated with this prep.

I have also found that the complaints of perianal itching and burning associated with various other conditions I come across in my practice are also easily treated with Calmoseptine Ointment.

I have also used this product to treat peristomal skin irritation quite successfully.

Sincerely,

Maurizio [redacted] M.D.
